

Water Supply Pipe Responsibilities

- Anglian Water responsibility ends at the boundary of the public highway, or at the stop tap / meter if inside the property boundary.
- Customers' responsibility can extend beyond their property boundary as **C** in the diagram.
- Supply pipe can be shared by more than one property (**D, E, F, G**) above. Responsibility for maintenance of the supply pipe is shared. All properties downstream of a leak are responsible for its repair.
 - Leak at **point 1** is the responsibility of property **C**
 - Leak at **point 2** is the responsibility of property **D**
 - Leak at **point 3** is the responsibility of property **E**
 - Leak at **point 4** is the responsibility of properties **D, E & F**
